ABT Wi-Fi

ABT Wi-Fi is a platform that gives users access to ABT Wi-Fi, which is present in many South African healthcare facilities. To get complete access to the system, users need to register. They can purchase data and Wi-Fi usage time after registering.

The aim of this is to provide more affordable internet connectivity to the communities using communal Wi-Fi access point like health care facilities and other government communal congregation points, businesses in rural areas where the is shortage of internet connection. By providing fast, reliable and affordable internet connectivity, we can connect communities and businesses, facilitate access to information and education, and enable people to work and communicate effectively- no matter where they are in the world.
